

Extension Cable 6-pin + Splitter 3-socket >

The cable together with the splitter allows you to connect more devices within the CIIM digital 1-Wire communication bus. It is intended for simultaneous operation of e.g. a temperature sensor and two RFID readers. The set includes a 6-pin cable with plugs and a 1->3 socket splitter. The cable only applies to the connector marked as Temp/RFID on the CIIM system. Do not use it with the socket marked as Comb.
