AU Iconic Face Plate Bezel ❯

The AU Iconic Face Plate Bezel enables the PowerCat 6A DataGate Jack with Universal Shutter (KSJ-00096-**) to be inserted into the Clipsal Pro and Iconic Series Face Plates. The bezel allows the Jack to be inserted from any direction into the Face Plate. A terminated Jack should be plugged into the bezel until it securely locks in place. The face plate and cover are then attached to the outlet.

Bezel Top and Side

Bezel fitting into wallplate and jack

FEATURES AND ADVANTAGES

The bezel can be loaded from the front of the plate

The jack can be inserted with a 90° increment

The jack allows cable entry from the top, left, or right of the jack

The bezel's quick latch allows for easy insert and locking of the jack to the bezel for a straightforward installation
